## AAU Students visit ADX

The College of Business at Al Ain University of Science and Technology, Abu Dhabi and Al Ain campuses organized a scientific visit to finance and banking students to Abu Dhabi Stock Exchange Market (ADX), implemented by Dr. Hassan Ismail Hassan, and Dr. Mosab Tabash.

The aim of the trip was to enhance the skills and the knowledge of the students by linking them to the reality of what actually happens in the marketplace, particularly in the stock market and trading. One of the ADX experts gave a very detailed and interesting presentation for the students in the context of the establishments of companies, stocks trading, financial market growth, and the performance of the companies of ADX.

At the end of the visit, students have expressed their satisfaction in what they have gained from the actual situation of the marketplace. Finally, Dr. Hassan and Dr. Mosab, on behalf of the university, thanked ADX management for their efforts in organizing and implementing this trip. This trip also enhances and supports the full coordination between the two campuses of the College of Business.
